INTRODUCTION

Only with knowledge can we free the world from hunger, malnutrition and poverty. According to the Basic Texts of the Food and Agriculture Organization of the United Nations (FAO), the Organization's first function is to "collect, analyse, interpret and disseminate information relating to nutrition, food and agriculture". FAO's strategic focus on "the four betters" – better production, better nutrition, a better environment, and a better life – provide the roadmap guiding this work, within the broader perspective of the Sustainable Development Goals (SDGs) agreed by the United Nations and the international community as part of the 2030 agenda.

FAO plays a unique role as a neutral forum, providing unbiased, high-quality information across all areas relating to food, agriculture and sustainable natural resources management. In 2021, FAO issued over 900 publications, ranging from authoritative analysis for policy makers and expert guidance for farmers to general knowledge for young people. Of these, an increasing number are now available in device-friendly formats. This catalogue includes a selection of the Organization's most recent titles, as well as some older publications that have become references in their respective fields. In addition to English, numerous reports are available in Arabic, Chinese, French, Russian and Spanish.

FLAGSHIPS

FAO'S FLAGSHIPS ARE THE LEADING PUBLICATIONS WITHIN THEIR RESPECTIVE DOMAINS. THEY STAND TOGETHER AS A COMPREHENSIVE OVERVIEW OF **THE STATE OF THE WORLD**. THEY PRIMARILY TARGET POLICY MAKERS AND DECISION-MAKERS, BUT ARE ALSO RELEVANT TO EXPERTS, ACADEMIA, STUDENTS, THE MEDIA AND THE GENERAL PUBLIC.

English, French, Russian, Spanish

*This yearly report informs on
progress towards ending hunger,
achieving food security and
improving nutrition, and analyses
the key challenges to achieving
these goals.*

This year's report should dispel any lingering doubts that the world is moving backwards in its efforts to end hunger, food insecurity and malnutrition in all its forms. We are now only eight years away from 2030, but the distance to reach many of the SDG 2 targets is growing wider each year. There are indeed efforts to make progress towards SDG 2, yet they are proving insufficient in the face of a more challenging and uncertain context. The intensification of the major drivers behind recent food insecurity and malnutrition trends (i.e. conflict, climate extremes and economic shocks) combined with the high cost of nutritious foods and growing inequalities will continue to challenge food

security and nutrition. This will be the case until agrifood systems are transformed, become more resilient and are delivering lower cost nutritious foods and affordable healthy diets for all, sustainably and inclusively.

THE STATE OF AGRICULTURAL COMMODITY MARKETS 2022

THE GEOGRAPHY OF FOOD AND AGRICULTURAL TRADE: POLICY APPROACHES FOR SUSTAINABLE DEVELOPMENT

Rome, 2022
ISBN 978-92-5-136373-7
128 pp., 210 x 297 mm
USD 60.00, Paperback
Also available in e-book format
Available in: Arabic, Chinese, English, French, Russian, Spanish

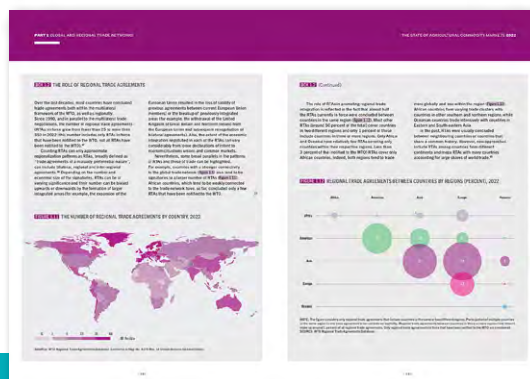

Published biennially, the series presents commodity market issues in an objective and accessible way to policy-makers, commodity market observers and stakeholders interested in these issues.

The State of Agricultural Commodity Markets 2022 (SOCO 2022) discusses how trade policies, based on both multilateral and regional approaches, can address today's challenges for sustainable development. Trade policies in food and agriculture should aim to safeguard global food security, address the trade-offs between economic and environmental objectives, and strengthen the resilience of the global agrifood system to shocks, such as conflicts, pandemics and extreme weather. The report discusses the geography of trade, analysing food and agricultural trade and its patterns across countries and regions, its drivers and the trade policy environment. Comparative advantage, trade policies and

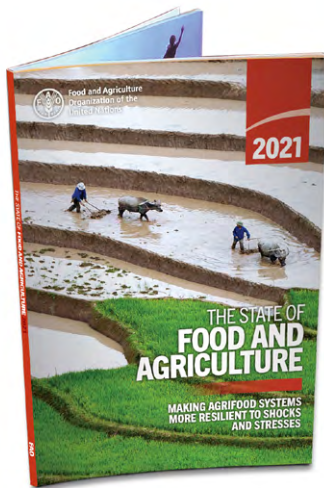

trade costs shape the patterns of trade in food and agriculture. When comparative advantage plays out in the global market, trade benefits all countries. Lowering tariff barriers and reducing trade costs can promote trade and economic growth. Both multilateral and regional trade agreements can facilitate the process of making trade an

avenue for growth but the gains of trade are distributed unevenly. When global environmental impacts, such as climate change, are considered, a multilateral approach to trade can help expand the reach of mitigation measures.

INTERACTIVE
STORY

THE STATE OF FOOD AND AGRICULTURE 2021

MAKING AGRIFOOD SYSTEMS MORE RESILIENT TO SHOCKS AND STRESSES

This series, published annually, aims at bringing to a wider audience balanced science-based assessments of important issues in the field of food and agriculture.

Rome, 2021
ISBN 978-92-5-134329-6
180 pp., 210 x 297 mm
USD 56.00, Paperback
Also available in e-book format
Available in: Arabic, Chinese, English, French, Russian, Spanish

**DIGITAL
REPORT**

The State of Food and Agriculture 2021 presents country-level indicators of the resilience of agrifood systems. The indicators measure the robustness of primary production and food availability, as well as physical and economic access to food. They can thus help assess the capacity of national agrifood systems to absorb

shocks and stresses, a key aspect of resilience. The report analyses the vulnerabilities of food supply chains and how rural households cope with risks and shocks. It discusses options to minimize trade-offs that building resilience may have with efficiency and inclusivity. The aim is to offer guidance on policies to enhance

food supply chain resilience, support livelihoods in the agrifood system and, in the face of disruption, ensure sustainable access to sufficient, safe and nutritious food to all.

THE STATE OF FOOD AND AGRICULTURE 2022

LEVERAGING AUTOMATION IN AGRICULTURE FOR TRANSFORMING AGRIFOOD SYSTEMS

The State of Food and Agriculture 2022 looks into the drivers and barriers to adoption of agricultural automation, including the more recent digital technologies. Based on 27 case studies, the report analyses the business case for agricultural automation technologies across the world, and suggests policies for inclusive and sustainable adoption.

FORTHCOMING 2 NOVEMBER 2022

**PRESS
RELEASE**

Against the backdrop of the Glasgow Leaders' Declaration on Forests and Land Use and the pledge of 140 countries to eliminate forest loss by 2030 and to support restoration and sustainable forestry, the 2022 edition of **The State of the World's Forests** (SOFO) explores the potential of three forest pathways for achieving green recovery and tackling multidimensional planetary crises, including climate change and biodiversity loss. The three interrelated pathways are halting deforestation and maintaining forests; restoring degraded lands and expanding agroforestry; and sustainably using forests and

THE STATE OF THE WORLD'S FORESTS 2022

FOREST PATHWAYS FOR GREEN RECOVERY AND BUILDING INCLUSIVE, RESILIENT AND SUSTAINABLE ECONOMIES

Rome, 2022
ISBN 978-92-5-135984-6
166 pp., 210 x 297 mm
USD 65.00, Paperback
Also available in e-book format
Available in: Arabic, Chinese,
English, French, Russian, Spanish

This series covers the status of forests, policy and institutional developments, and other key issues concerning the forest sector. It shares current, reliable and relevant information to facilitate informed discussion and decision-making.

building green value chains. The balanced, simultaneous pursuit of these pathways can generate sustainable economic and social benefits for countries and their rural communities, help sustainably meet increasing global demand for materials, and address environmental challenges. The State of the World's Forests 2022 presents evidence on the feasibility and value of these pathways and outlines initial steps that could be taken to further pursue them. There is no time to lose – action is needed now to keep the global temperature increase below 1.5 °C, reduce the risk of future pandemics, ensure

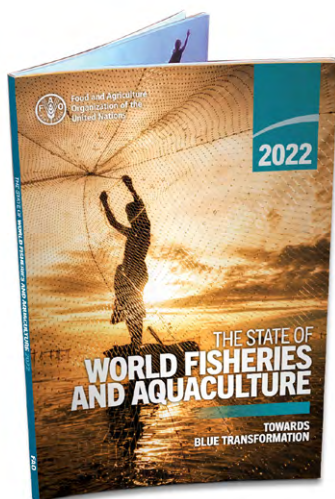

food security and nutrition for all, eliminate poverty, conserve the planet's biodiversity and offer young people hope of a better world and a better future for all.

THE STATE OF WORLD FISHERIES AND AQUACULTURE 2022

TOWARDS BLUE TRANSFORMATION

Rome, 2022

ISBN 978-92-5-136364-5; 266 pp., 210 × 297 mm

USD 75.00, Paperback; Also available in e-book format

Available in: Arabic, Chinese, English, French, Russian, Spanish

The State of World Fisheries and Aquaculture series is a unique source of objective, reliable and up-to-date global information on fisheries and aquaculture development, of relevance to policy-makers, managers, scientists and all those interested in the sector.

The 2022 edition of **The State of World Fisheries and Aquaculture** coincides with the launch of the Decade of Action to deliver the Global Goals, the United Nations Decade of Ocean Science for Sustainable Development and the United Nations Decade on Ecosystem Restoration. It presents how these and other equally important United Nations events, such as the International Year of Artisanal Fisheries and Aquaculture (IYFA 2022), are being integrated and supported through Blue Transformation, a priority area of FAO's

new Strategic Framework 2022–2031 designed to accelerate achievement of the 2030 Agenda for Sustainable Development in food and agriculture. The concept of Blue Transformation emerged from the Thirty-fourth Session of the FAO Committee on Fisheries in February 2021, and in particular the Declaration

for Sustainable Fisheries and Aquaculture, which was negotiated and endorsed by all FAO Members. The Declaration calls for support for “an evolving and positive vision for fisheries and aquaculture in the twenty-first century, where the sector is fully recognized for its contribution to fighting poverty, hunger and malnutrition.”

GENERAL INTEREST

FAO AT 75

GROW, NOURISH,
SUSTAIN. TOGETHER

Seventy-five years down the line, FAO's name, ambition and spirit remain: everything else has changed, and will change further.

Born in 1945 amid the idealism of post-war reconstruction, the Food and Agriculture Organization of the United Nations sets out to increase farm output around the world and make famines a thing of the past. Over the subsequent 75 years, FAO's outlook and body of work acquire new environmental and sustainability dimensions. By 2020, continued success requires strategic re-invention.

Rome, 2020

ISBN 978-92-5-133359-4

80 pp., 250 x 200 mm

USD 90.00, Paperback

Introduction

Wipe out of harm's. Wipe out of waste. And out of
waste, a new village up of dreams.

The year is 1945. The end of the war is opening
new doors. The world is hungry and human
endurance is exhausted. In the aftermath of the war,
and social justice, in industry and engineering, in the
business and the arts. But also, and not least, in the
realm of values and aspirations.

A commitment to peace is the new predominant mood.
In a sense of the world. Despite the emergence of
new dangers in the form of the Cold War, and despite
renewing colonial tensions, a new internationalism
takes root. With a common determination to end, once
and for all, the ills that have plagued humankind since
its inception.

Chart among them are poverty and hunger.

MODULE 3

What can we take from forests?

I wonder

What parts and how many of our everyday products come from the woods? How do you tell the difference between these products? Can we make things from what we find in the forest? Can we take as much as we want or need? In this module, you will make discoveries in class and explore various forest materials and foods, such as the insects shown below. You will also learn about fascinating forest resources, including honey, rubber and medicines.

25 THE STATE OF OUR FORESTS

investigate

Forests from around the world – and more
There are several kinds of forest around the world: tropical dry forests (these are found in regions with a warm climate)

North America, mountain forests, near-the-sea mangrove forests, boreal coniferous forests from cold climate lands and more.

Forest from around the world

Forest from around the world

Forest from around the world

Forest from around the world

Forest from around the world

manage the planet wisely and become the agents of change. The modules provide insights on a variety of wooded areas, from the field or park next door to the world's major forests, and cover a wide range of subject matter, from forest ecosystems to water resources, products and tenure issues.

The learning approach draws inspiration from the enquiry method, while content draws upon FAO's major biennial report on the **State of the World's Forests** and other key forestry publications. The modules are conceived to be customizable to help teachers tie in with curriculum objectives, ranging from science to geography and citizenship.

TEACHING GUIDE

- ▶ Practical and flexible
- ▶ Customizable interdisciplinary content (science, geography, citizenship, language)

FOOD OUTLOOK

BIANNUAL REPORT ON
GLOBAL FOOD MARKETS.
JUNE 2022

Rome, 2022

ISBN 978-92-5-136028-6

174 pp., 210 x 297 mm

USD 61.00, Paperback

Available in: English (full version).

Arabic, Chinese, French, Russian,

Spanish (summary version)

In view of the soaring input prices, concerns about the weather, and increased market uncertainties stemming from the war in Ukraine, FAO's latest forecasts point to a likely tightening of food markets and food import bills reaching a new record high.

FORTHCOMING

THE FUTURE OF FOOD AND AGRICULTURE

DRIVERS AND TRIGGERS
FOR TRANSFORMATION

The report explores eighteen drivers of agrifood systems, depicts by means of qualitative narratives four different scenarios for the future of agrifood systems, and highlights key 'triggers' and strategic options for their transformation.

WORLD FOOD AND AGRICULTURE

STATISTICAL YEARBOOK 2021

Rome, 2020; ISBN 978-92-5-134332-6

**DIGITAL
REPORT**

Available in digital format, this year's edition also discusses selected indicators for which FAO is a contributing agency and/or have key implications for food and agriculture across these Goals. These additional indicators provide valuable information on agricultural losses due to disasters, the distribution of land tenure rights, and the impact of international trade policies and regulations on agricultural trade, especially in developing and Least Developed Countries.

AGRICULTURE

Resilient food systems are at the heart of how to feed the world in the face of climate change, global health threats and regional conflicts. They are the explicit focus of several publications that detail good agricultural practices, outline policy responses to the food crisis, and provide analysis of the **disaster risk reduction system** for the agricultural sector (p. 43).

Sustainable agricultural practices can help regenerate ecosystems and mitigate future threats to livelihoods and the health of people, animals and the environment. Several publications address sustainable practices and policy responses on themes including crop diversity and seeds, soil management and water management (pp. 44–47). Understanding our agricultural resources and increasing efficiency will be essential for transforming food systems. A number of publications explore data-driven approaches, digital innovations and technology such

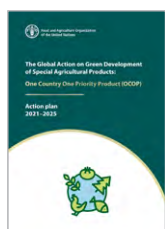

as agricultural drones and digital farming services (p. 48). With the acceleration of urbanization, **urban and peri-urban agriculture (UPA)** becomes a vital strategy for building the resilience of cities' food supply, reducing poverty and increasing employment (p. 49). The Global Action on Green Development of Special Agricultural Products: **"One Country One Priority Product"** (OCOP) has been developed (p. 39), with the aim of achieving an environmentally sustainable increase in production and access to affordable and healthy diets. ■

EUROPEAN GOOD PRACTICES ON LAND BANKING

FAO STUDY AND RECOMMENDATIONS

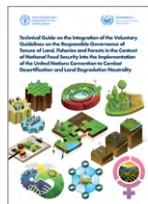

This study reveals that the main land banking approach in Europe involves the acquisition of private agricultural land by a public purpose entity (land bank), its interim management in the form of a short-term lease, and the subsequent sale or exchange of land. Lease facilitation was identified as the second major approach to land banking.

URBAN AND PERI-URBAN AGRICULTURE

CASE STUDIES

FAO & Rikolto, Rome, 2022
ISBN 978-92-5-136112-2
60 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

These case studies demonstrate various benefits of urban and peri-urban agriculture, including improvements in income, access to diverse and nutritious food, social cohesion and environmental health. To help farmers gain more capital investments, developing co-signatory agreements between farmer cooperatives and banks is recommended.

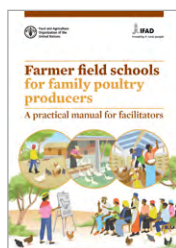

URBAN AND PERI-URBAN AGRICULTURE SOURCEBOOK

FROM PRODUCTION TO FOOD SYSTEMS CASE STUDIES

FAO, Rikolto, RUAF, Rome, 2022
ISBN 978-92-5-136111-5
156 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

This sourcebook covers typologies, scopes and benefits of urban and peri-urban agriculture. Good practices are introduced, such as ground-based crop production, organic farming, and manure and urban waste composting.

FARMER FIELD SCHOOLS FOR FAMILY POULTRY PRODUCERS

A PRACTICAL MANUAL FOR FACILITATORS

FAO & IFAD
Rome, 2022
ISBN 978-92-5-136286-0
220 pp., 210 x 297 mm
USD 73.00, Paperback
Available in: English

This manual seeks to help facilitators implement good quality farmer field schools. It focuses on working with women and men poultry producers to sustainably enhance production and marketing in the family poultry production system, ranging from extensive to small-scale intensified.

ANIMAL PRODUCTION AND HEALTH

Animal production systems play a key role in the path towards a more economically, socially and environmentally sustainable world, free from hunger. To tackle the many challenges and opportunities that the livestock sector must face, the first session of the Sub-Committee on Livestock of the Committee on Agriculture was held 16–18 March 2022.

In close partnership with the United Nations Environment Programme (UNEP), the World Health Organization (WHO) and the World Organisation for Animal Health (WOAH), FAO promotes the **One Health** approach to sustainably balance and optimize the health of people, animals and ecosystems (p. 53).

African swine fever (ASF) has had demonstrable impacts on food security and economics. As the disease expands into new territories, the series of

the “**Guidelines for African swine fever (ASF) prevention and control**” was developed to provide guidance on preparedness and control activities (p. 58).

FAO works directly with countries to reduce methane and other greenhouse gas emissions from the livestock sector, integrate **livestock-specific interventions** in national climate commitments, and assess the environmental impact of livestock systems at the global, regional and national level. ■

THE FAO ACTION PLAN ON ANTIMICROBIAL RESISTANCE 2021-2025

SUPPORTING INNOVATION AND RESILIENCE IN FOOD AND AGRICULTURE SECTORS

This new action plan raises awareness and promotes good antimicrobial resistance (AMR) practices. A list of key activities is presented, which includes the development of guidelines and communication products, and the support of Members through laboratory training.

GUIDELINES FOR AFRICAN SWINE FEVER (ASF) PREVENTION AND CONTROL IN SMALLHOLDER PIG FARMING IN ASIA

MONITORING AND SURVEILLANCE OF ASF

Bangkok, 2022
ISBN 978-92-5-134825-3
76 pp., 210 x 297 mm
USD 27.00, Paperback
Available in: English

This document provides guidance for government officials in defining surveillance objectives; establishing ASF-related case definitions and reporting criteria; and providing examples of potential ASF surveillance methods, including passive surveillance and active surveillance.

CULLING AND DISPOSAL OF PIGS IN AN AFRICAN SWINE FEVER OUTBREAK

Bangkok, 2022
ISBN 978-92-5-135957-0
68 pp., 210 x 297 mm
USD 23.00, Paperback
Available in: English

This document provides guidance on planning and conducting pig culling and disposal operations in smallholder settings. It suggests conducting culling on-site to minimize handling and movement of animals and confirming death of the animals before disposal of the carcasses.

FARM BIOSECURITY, SLAUGHTERING AND RESTOCKING

Bangkok, 2022
ISBN 978-92-5-135956-3
86 pp., 210 x 297 mm
USD 31.00, Paperback
Available in: English

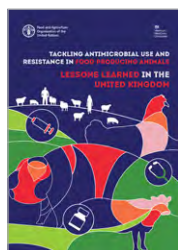

This guideline showcases good biosecurity measures such as using pig manure to produce biogas. It stresses that practical biosecurity measures must take a targeted approach considering the disease, livestock species and the farming system involved.

CLEAN CHAIN APPROACH FOR AFRICAN SWINE FEVER IN SMALLHOLDER SETTINGS

This guideline outlines the principles of an African swine fever clean-chain system for smallholder pig producers in Southeast Asia, including the development of a business plan that defines the clean-chain system and the establishment of a partnership between veterinary authorities and private sector stakeholders.

GF-TADS STRATEGY FOR 2021-2025

ENHANCING CONTROL OF TRANSBOUNDARY ANIMAL DISEASES FOR GLOBAL HEALTH

FAO & OIE, Rome, 2021
ISBN 978-92-5-134947-2
28 pp., 210 x 297 mm
Price available upon request,
Paperback
Available in: English

The Global Framework for the Progressive Control of Transboundary Animal Diseases (GF-TADS) is a coordination mechanism established to safeguard its Members from repeated incursions of infectious animal disease epidemics. This strategy identified three objectives: establishing priority, developing capacity and improving the sustainability of priority strategies.

AREAS OF WORK

CLIMATE CHANGE

Climate change and increasingly extreme weather events have caused a rise in natural disasters over the past 50 years, affecting agriculture, forests and other land-use sectors, and disproportionately impacting poorer countries. Greenhouse gas (GHG) emissions from the agrifood sectors represent one third of total GHG emissions, caused

mainly by deforestation, livestock production, soil and nutrient management, and food loss and waste. For agriculture to become part of the climate solution and to ensure sustainable, affordable and healthy diets for a world population foreseen to increase to 9.9 billion by 2050, **agrifood systems** need to be transformed and strengthened through effective climate change **adaptation** and **mitigation** (p. 63). FAO supports countries in both mitigating and adapting to the effects of climate change and building the resilience of both urban and rural populations.

FAO works to enhance countries' capacities to implement their **Nationally Determined Contributions (NDCs)** under the Paris Agreement, in line with the Sustainable Development Goals (SDGs). To further strengthen this endeavour and provide guidance to governments and other stakeholders working on climate change, FAO has developed a wide range of publications and guidance notes, on topics ranging from **climate-smart agriculture** (p. 64) to climate finance and the **bioeconomy** (p. 61). ■

CLIMATE CHANGE IMPACTS ON TWENTY MAJOR CROP PESTS IN CENTRAL ASIA, THE CAUCASUS AND SOUTHEASTERN EUROPE

This study finds that of the 20 major pests, habitat suitability is projected to largely shift for the pest *Blumeria graminis* and the pest *Thanatephorus cucumeris*. These pest-specific projections can be used to develop mechanisms that will contribute to the avoidance of large crop losses in the future.

ECONOMIC AND SOCIAL DEVELOPMENT

Achieving food security for all requires giving vulnerable and marginalized communities access to resources, services and economic opportunities. FAO provides research and analysis to inform decision-making, help governments mainstream food security into agricultural policy and support a rural transformation where **no one is left behind**.

FAO's work emphasizes the importance of adequate **social protection systems** (p. 72) that diversify rural employment opportunities, improve people's access to land and resources, and reduce gender and social inequalities. In 2021, which marked the International Year for the Elimination of Child Labour, FAO reaffirmed its commitment to preventing child labour and

promoting youth employment, in line with the FAO Framework on **Ending Child Labour in Agriculture** (p. 75). Several papers (p. 71) look into legal instruments that cover themes of human rights, tenure and preventive justice and land corruption. Other titles focus on the affordability of healthy diets, gender equality and youth empowerment (p. 67). ■

**IN BRIEF****A MULTI-BILLION-DOLLAR OPPORTUNITY**

REPURPOSING AGRICULTURAL SUPPORT
TO TRANSFORM FOOD SYSTEMS

This report sets out the compelling case for repurposing harmful agricultural producer support to reverse this situation, by optimizing the use of scarce public resources, strengthening economic recovery from the COVID-19 pandemic, and ultimately driving a food systems transformation that can support global sustainable development commitments.

FAO LEGAL PAPERS

With either a country-specific or subject-specific focus, these papers explore issues of international law, or contain reports on emerging legal issues related to food and agriculture, such as on the human right to water for food and agriculture.

HUMAN RIGHTS AND THE ENVIRONMENT

THE INTERDEPENDENCE OF HUMAN RIGHTS AND A HEALTHY ENVIRONMENT IN THE CONTEXT OF NATIONAL LEGISLATION ON NATURAL RESOURCES

This paper reflects on the evolution of international law on the interdependence of human rights and the environment. It highlights the increasing cross-fertilization between international environmental law and international human rights law, focusing specifically on nature conservation and the rights of Indigenous Peoples.

RIGHTS

This guide provides readers with a basic understanding of the functional linkages between land tenure and land-based investments. It illustrates the process of protecting and securing legitimate tenure rights through recordation, describes how to use fit-for-purpose technology to strengthen the process, identifies choices in selecting the appropriate technology based on objectives and context, and provides clear criteria to inform the choice.

FISHERIES AND AQUACULTURE

The fisheries and aquaculture sectors have been increasingly recognized for their essential contribution to global food security and nutrition. Further expansion of this contribution requires the acceleration of transformative changes in policy, management, innovation and investment to achieve sustainable and equitable global fisheries and aquaculture.

In this context, the launch of **The State of World Fisheries and Aquaculture 2022 – Towards Blue Transformation** at the UN Ocean Conference 2022 in Lisbon, Portugal in June 2022, coincided with the start of the Decade of Action to deliver the Global Goals, the United Nations Decade of Ocean Science for Sustainable Development, and the United Nations Decade on Ecosystem Restoration. These actions, together with other important United Nations events such as the **International Year of Artisanal Fisheries and**

Aquaculture (IYAFA 2022), are being integrated and supported through **Blue Transformation**, a priority area of FAO's new Strategic Framework 2022–2031 (p. 81) designed to accelerate achievement of the 2030 Agenda for Sustainable Development. The FAO Committee on Fisheries, held in September 2022 in Rome, also registered successful outcomes such as the endorsement of a new Subcommittee of Fisheries Management or the new Voluntary Guidelines for Transshipment. FAO will support these outcomes with a number of publications on related subjects. ■

Available in: English

Based on a literature review of gender in fisheries and aquaculture in Asia, this study shows that women are active in post-harvest activities such as processing and trade. However, in terms of access to assets, women's lower education levels deprive them of opportunities and advantages.

REPORT OF VULNERABILITY AND CAPACITY ASSESSMENTS IN COASTAL AND FISHING COMMUNITIES IN GRENADA

Rome, 2022

ISBN 978-92-5-135173-4; 73 pp., 210 x 297 mm

Price available upon request, Paperback

Available in: English

Based on the assessment, a range of climate-related hazards such as coastal erosion, flooding and storm surges have begun to impact the communities. Adaptation actions were suggested, including building the adaptive capacity of fisherfolk and improving access to insurance, services and infrastructure.

FOOD SAFETY

FAO is working with countries around the world to strengthen food systems and ensure that everyone has access to safe and nutritious food. FAO and the World Health Organization (WHO) celebrated the fourth annual World Food Safety Day on 7 June 2022.

Jointly with WHO, FAO is responsible for the **Codex Alimentarius**, a collection

of internationally adopted food standards to protect consumer health through a safe and secure food supply and promote fair practices in **food trade**. FAO has developed strategies to **address food fraud** (p. 101) and guidance on official food controls, which support regulators and the private sector to ensure that consumers have access to **safe and quality food**.

FAO also provides scientific advice in food safety (microbial and chemical hazards) (p. 97) and nutrition that serves as the basis for the Codex Alimentarius. ■

CODEX 2021

A YEAR OF VIRTUAL REALITY

This publication captures the advances in international food safety standard-setting during the COVID-19 pandemic.

Rome, 2021
ISBN 978-92-5-135295-3
76 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

GUIDE TO WORLD FOOD SAFETY DAY 2022

FAO & WHO, Rome, 2022
8 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: Arabic, Chinese, English, French, Russian, Spanish

THINKING ABOUT THE FUTURE OF FOOD SAFETY

A FORESIGHT REPORT

This foresight report analyses how emerging global drivers and trends and their related opportunities and challenges might affect food safety. It is designed to support a shift from a reactionary to an anticipatory approach, enhancing strategic preparedness through long-term thinking.

Rome, 2022
ISBN 978-92-5-135783-5
158 pp., 210 x 297 mm
USD 57.00, Paperback
Available in: English

FOODBORNE ANTIMICROBIAL RESISTANCE

COMPENDIUM OF CODEX STANDARDS

This publication brings together the three Codex texts, two guidelines and a code of practice, that will support governments in designing and running a successful strategy to tackle foodborne AMR.

FAO & WHO, Rome, 2022
ISBN 978-92-5-135734-7
112 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

CODE OF PRACTICE FOR FISH AND FISHERY PRODUCTS

FAO & WHO, Rome, 2020
ISBN 978-92-5-133170-5
372 pp., 210 x 297 mm
USD 104.00, Paperback
Also available in e-book format
Available in: Arabic, Chinese, English, French, Russian, Spanish

This series provides information on the identity and purity of food additives used directly in foods or in food production.

COMPENDIUM OF FOOD ADDITIVE SPECIFICATIONS

91st MEETING –
VIRTUAL MEETING,
1–12 FEBRUARY 2021

This meeting revised the specifications for steviol glycosides.

LOOKING AT EDIBLE INSECTS FROM A FOOD SAFETY PERSPECTIVE

CHALLENGES AND
OPPORTUNITIES FOR
THE SECTOR

Edible insects can diversify diets, improve livelihoods, contribute to food and nutrition security and have lower ecological footprint as compared to other sources of protein. These potential benefits combined with a heightened interest in exploring alternative sources of food that are both nutritious and environmentally sustainable are spurring commercial production of insects as food and animal feed. While acknowledging the different opportunities that the sector might bring, this publication analyses the food safety implications associated with edible insects.

MICROBIOLOGICAL RISK ASSESSMENT SERIES

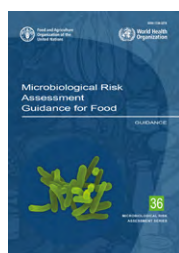

The series contains information that is useful to food safety risk assessors and risk managers with an interest in microbiological criteria.

SAFETY AND QUALITY OF WATER USED WITH FRESH FRUITS AND VEGETABLES

This report examines appropriate and fit-for-purpose microbiological criteria for water used with fresh fruit and vegetables. Key findings show that the risk of pathogen contamination can be reduced by adopting prerequisite programmes and risk assessment.

FAO & WHO, Rome, 2022
ISBN 978-92-5-135345-5
152 pp., 148 x 210 mm
USD 92.00, Paperback
Available in: English

MICROBIOLOGICAL RISK ASSESSMENT GUIDANCE FOR FOOD

This document provides guidance on undertaking risk assessment on microbiological hazards in foods. It covers hazard identification, hazard characterization, exposure assessment, and risk characterization, and also includes qualitative and semi-qualitative examples.

FAO & WHO
Rome, 2021

FOOD SAFETY ASPECTS OF CELL-BASED FOOD

BACKGROUND DOCUMENT ONE
TERMINOLOGIES

Rome, 2022
ISBN 978-92-5-136941-8; 30 pp. 210 x 297 mm
Price available upon request, Paperback
Available in: English

This document provides a synthesis of the available literature on the existing terminologies in the area of cell-based food production and their associated positive and negative attributes, and recommends options for the terms to use at the global level.

PESTICIDE MONITORING PROGRAMME IN ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN)

SITUATION ANALYSIS REPORT

Bangkok, 2021
ISBN 978-92-5-134425-5; 84 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

This report presents the results of a questionnaire that assesses the status of pesticide monitoring programmes. Key findings indicate that many countries lack the technical capacities to undertake regulatory functions, including pesticide registration.

GROUP B *STREPTOCOCCUS* (GBS): *STREPTOCOCCUS AGALACTIAE* SEQUENCE TYPE (ST) 283 IN FRESHWATER FISH

RISK PROFILE

Bangkok, 2021
ISBN 978-92-5-134543-6; 80 pp., 210 x 297 mm
USD 62.00, Paperback
Available in: Chinese, English, Portuguese, Spanish

This publication assesses the risks of Group B *Streptococcus* (GBS) along the freshwater fish supply chain, covering wild capture, transport, retail, and consumption. It stresses the role of good water quality and good fish husbandry management for reducing GBS disease in fish.

FOOD SAFETY TECHNICAL TOOLKIT FOR ASIA AND THE PACIFIC

This set of publications summarizes the collaboration between FAO and the Association of Southeast Asian Nations (ASEAN) to improve the participation of ASEAN countries in Codex Alimentarius.

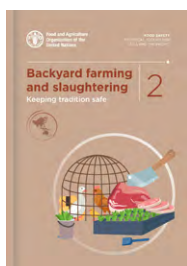

LAYMAN'S GUIDE TO FOOD SAFETY IN ASIA AND THE PACIFIC

INTRODUCTION TO THE FOOD SAFETY TOOLKIT

This document provides a layman's introduction to many food safety topics that are currently observed in the area, providing a list of possible documentation to rely on.

INVESTING IN FOOD SAFETY FOR GLOBAL BENEFITS

A CONCRETE CASE IN THE ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) COUNTRIES

This volume describes the FAO–ASEAN project on food safety, funded by the government of Japan, which has contributed to improving consumers' health and to facilitating food trade, and has strengthened the trade between ASEAN and Japan.

Bangkok, 2021
40 pp., 148 x 210 mm
Paperback
Available in: English

FOOD ALLERGIES

LEAVING NO ONE BEHIND

This document illustrates current practices to establish labelling regulations for food allergens, with a focus on Japan, the first country to establish such national regulations. It describes the methodology of establishing a food allergen list and identifying regulatory limits.

Bangkok, 2021
44 pp., 148 x 210 mm
Paperback
Available in: English

FOOD FRAUD

INTENTION, DETECTION
AND MANAGEMENT

This publication recommends strengthening legal interventions and adopting new technologies to combat fraud, such as using portable testing devices to detect adulterated food.

Bangkok, 2021
44 pp., 148 x 210 mm
Paperback
Available in: English

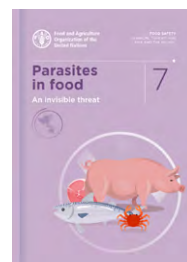

ORGANIC FOODS

ARE THEY SAFER?

This paper discusses the social and economic aspects of organic agriculture and its relationship to food safety. It emphasizes that while an "organic" label is attractive to consumers, it is not a guarantee of food safety.

Bangkok, 2021
40 pp., 148 x 210 mm
Paperback
Available in: English

PARASITES IN FOODS

AN INVISIBLE THREAT

This report focuses on the major foodborne parasites transmitted by pork, freshwater fish and freshwater crustaceans. It advocates that authorities take action to prevent human exposure to these diseases, particularly through awareness campaigns and stakeholder engagement.

Bangkok, 2021
ISBN 978-92-5-133585-7
48 pp., 148 x 210 mm
Paperback
Available in: English

SLOWING DOWN SUPERBUGS

LEGISLATION AND
ANTIMICROBIAL
RESISTANCE

Bangkok, 2021
ISBN 978-92-5-134208-4
36 pp., 148 x 210 mm
Paperback
Available in: English

This document presents in detail the connection between food safety legislation and antimicrobial resistance (AMR), and discusses how the maximum residue limits of pesticides and antimicrobials can directly impact AMR.

MEASURING FOOD SAFETY

INDICATORS TO
ACHIEVE SUSTAINABLE
DEVELOPMENT GOALS

Bangkok, 2021
ISBN 978-92-5-134205-3
66 pp., 148 x 210 mm
Paperback
Available in: English

This guide aims at providing countries with the building blocks to develop their own food safety indicators, offering a set of tools to national food safety competent authorities to establish food safety indicators, including a good understanding regarding practical actions and a thorough understanding of what can be done and not done through food safety indicators.

FORESTRY

As providers of crucial ecosystem and socioeconomic benefits and services, forests are high on the 2030 Agenda for Sustainable Development. A number of new publications aim to offer guidance on different aspects of ecosystem and socioeconomic benefits and services related to forestry, especially in the context of the ongoing UN Decade on

Ecosystem Restoration 2021–2030 and scaling up of restoration efforts that can revive and replenish degraded ecosystems. Several FAO publications particularly emblematic of that intent are: *Global Forest Resources Assessment 2020 Remote Sensing Survey* (p. 103), *Ecosystem Restoration for People, Nature and Climate* (p. 106), *Forest Communities in the face of the COVID-19 Crisis* (p. 104) and *Global Forest Industries Outlook 2050* (p. 104) and *Assessing the Future Demand and Sources for Timber in a Sustainable Economy* (forthcoming).

FAO's flagship report, *The State of the World's Forests 2022: Forestry and green recovery*, building inclusive and sustainable green economies, was released on 2 May (p. 12), indicating three forest pathways for achieving green recovery and tackling multidimensional planetary crises. Important forestry events held in 2022 include the **International Day of Forests** (celebrated on 21 March), the **XV World Forestry Congress** (2–6 May) and the twenty-sixth session of the **FAO Committee on Forestry (COFO)** from 3–7 October. ■

WILD CHECK

ASSESSING RISKS AND OPPORTUNITIES OF TRADE IN WILD PLANT INGREDIENTS

Rome, 2022
ISBN 978-92-5-135965-5
140 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

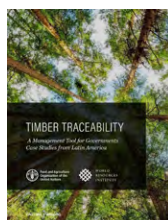

This report sheds light on twelve “flagship” species that are hidden in our everyday products, including Brazil nuts, shea butter and gum arabic. The report provides a profile on each ingredient that summarizes critical facts about production and trade.

FRA 2020 REMOTE SENSING SURVEY

Rome, 2022
ISBN 978-92-5-136147-4
92 pp., 210 x 297 mm
Price available upon request
Paperback
Available in: English

According to the report, there is a slowdown in the trend of global deforestation. Nevertheless, high deforestation rates were recorded in South America, as well as Africa and Asia. It reveals that 90 percent of deforestation worldwide is attributed to agricultural expansion.

TIMBER TRACEABILITY

A MANAGEMENT TOOL FOR GOVERNMENTS. CASE STUDIES FROM LATIN AMERICA

FAO & WRI, Rome, 2022
ISBN 978-92-5-135864-1
102 pp., 210 x 297 mm
USD 36.00, Paperback
Available in: English

Traceability systems can help to formalize the forest sector and increase the collection of taxes and royalties by governments. Based on lessons learned from Latin America, this study suggests developing traceability systems with a phased-in approach, including an initial penalty-free period.

A photograph of a man driving a red tractor in a rural field. The tractor has a license plate that reads 'KTC 326E'. In the background, another man is standing near a wooden fence. The scene is set in a dry, hilly landscape with some trees and a small building in the distance.

AREAS OF WORK

INVESTMENT

Investment is a critical engine for each country to multiply its impact, to build sustainable, inclusive agrifood systems. FAO brings innovation and technical and policy expertise to enrich the agriculture investment process. The FAO Investment Centre brokers between country demand and supply of investment and finance, working in close collaboration with international financial partners.

Through its Investment Centre, FAO continues to strengthen its expertise in **mobilizing investment** to promote **agrifood systems transformation**, adapting to global trends and the emerging priorities of countries and financing institutions. The Investment Centre partners with international and national financing institutions, technical divisions, research centres and public and private sector innovators, to analyze complex

investment challenges and deliver practical, evidence-based solutions for sustainable food and agriculture.

The **Knowledge for Investment (K4I)** publication series provides a strong evidence-based voice, keeping pace with the latest thinking and a constantly evolving investment landscape. The series includes: **Directions in Investment, Country Investment Highlights, Investment Toolkits**, and **Investment Briefs**. ■

INVESTING IN AGRICULTURAL WATER, SUSTAINABLY

RECENT TRENDS IN FINANCING INSTITUTIONS

Over a quarter of all international financing institutions' agricultural investments were in water resources. But investment impact evaluations reveal an unequal distribution of the benefits and costs of irrigation and drainage investments, such as unequal land distribution.

AREAS OF WORK

NUTRITION

Better nutrition is one of the four fundamental aspirations guiding FAO's support to countries in reaching the Sustainable Development Goals (SDGs). Working through partnerships and ensuring multi-sectoral collaboration, FAO plays a key role in reorienting current agrifood systems, making them more sustainable, inclusive and resilient, so as to enable

access to **affordable healthy diets** and **improve nutrition** for all. FAO's publications for nutrition aim to support a wide range of actors, from policy makers to researchers and extension workers, with products such as: *School Food and Nutrition – Global Action Plan 2022–2026* (p. 113), *Mapping of Territorial Markets: Methodology and guidelines for participatory data collection*

(p. 115) and *Assessment of Retail Food Environments and Green Spaces for Healthy Cities* (p. 115).

In addition, here are some key dates for 2022: **World Food Day** was celebrated on 16 October, and the **International Day of Awareness of Food Loss and Waste** was celebrated on 29 September. ■

VISION AND STRATEGY FOR FAO'S WORK IN NUTRITION

Rome, 2021
20 pp., 210 x 297 mm
Paperback
Available in: Arabic, Chinese, English, French, Russian, Spanish

FAO works towards a world where all people are eating healthy diets from sustainable, inclusive and resilient agrifood systems. This document describes FAO's nutrition strategy, consisting of an Accountability Framework and an Implementation Plan.

FAO REGIONAL STRATEGY ON FOOD LOSS AND WASTE REDUCTION IN ASIA AND THE PACIFIC

Bangkok, 2022
ISBN 978-92-5-135884-9
128 pp., 210 x 297 mm
Available in: English

The strategy builds upon five key pillars: i) raising awareness; ii) identifying food loss and waste critical points along supply chains; iii) enabling investments; iv) monitoring progress towards SDG indicator 12.3.1; and v) implementing coherent governance frameworks.

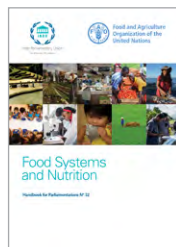

SCHOOL FOOD AND NUTRITION

GLOBAL ACTION PLAN 2022-2026

Rome, 2022
ISBN 978-92-5-136615-8
39 pp., 210 x 297 mm
Available in: English

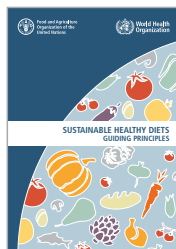

The development of this plan follows the publication and dissemination of the Organization's School Food and Nutrition Framework, and provides the implementation roadmap to attain its expected results.

MAPPING OF TERRITORIAL MARKETS: METHODOLOGY AND GUIDELINES FOR PARTICIPATORY DATA COLLECTION

Rome, 2022
ISBN 978-92-5-136047-7
38 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English, French, Spanish

In many developing countries, territorial markets are key retail outlets for fruits and vegetables, but also for animal source foods and staple foods. Besides the relevance, data concerning the availability of the different food groups and characteristics of food retailers and consumers in territorial markets are seldom considered in national data collection systems. This publication presents a structured methodology and a series of guidelines for mapping territorial markets, as developed by the Food and Agriculture Organization of the United Nations (FAO), along with representatives of producer organizations and academics.

FOOD CONSUMPTION IN THE MARSHALL ISLANDS

BASED ON ANALYSIS OF THE
2019/20 HOUSEHOLD INCOME
AND EXPENDITURE SURVEY

Majuro, 2021
ISBN 978-92-5-135299-1
92 pp., 210 x 297 mm
USD 68.00, Paperback
Available in: English

This analysis of the Marshall Islands reveals that more than one household in three is experiencing moderate or severe levels of food insecurity. Income, the size of the household, and the level of education are factors of inequality in access to food.

ASSESSMENT OF RETAIL FOOD ENVIRONMENTS AND GREEN SPACES FOR HEALTHY CITIES

METHODOLOGICAL GUIDANCE BASED
ON THE EXPERIENCES IN DAR ES SALAAM,
LIMA, TUNIS FOOD ENVIRONMENTS ARE
VITAL FOR SHAPING EATING HABITS

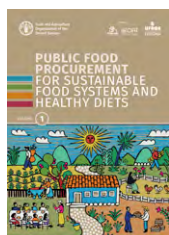

This study finds that small neighborhood food shops are important for household food security, particularly for low- to middle-income households. Policies should encourage these shops to stock and sell fresh and minimally processed foods.

STEPPING UP – EVERYONE AROUND THE TABLE FOR BETTER NUTRITION AND HEALTHY DIETS

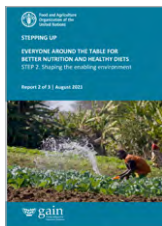

STEP 1: THE ROLE OF THE PRIVATE SECTOR

FOCUS ON SMALL AND MEDIUM ENTERPRISES

FAO & GAIN, Rome, 2021
ISBN 978-92-5-133425-6
56 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

Small and medium enterprises (SME) provide the bulk of food that people eat, especially those who are resource-constrained. This paper explains how to leverage the drivers behind business actions to transform food systems, including the provision of tax breaks and technical assistance.

STEP 2: SHAPING THE ENABLING ENVIRONMENT

FAO & GAIN, Rome, 2021
ISBN 978-92-5-133426-3
72 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

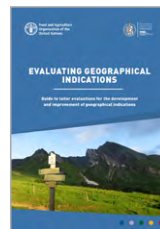

This paper sets out channels to advance the agenda of better nutrition by improving the enabling environment: the policies, incentives, rules and regulations that shape behaviours. It also highlights the development of multistakeholder platforms.

STEP 3: GOING TO SCALE

FAO & GAIN, Rome, 2021
ISBN 978-92-5-133429-4
68 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

This paper looks at scaling better diets, with a focus on leveraging small and medium enterprises. Good examples are showcased, including GAIN's Marketplace for Nutritious Foods, which offers affordable foods through improved productivity and reduced losses.

EVALUATING GEOGRAPHICAL INDICATIONS

GUIDE TO TAILOR EVALUATIONS FOR THE DEVELOPMENT AND IMPROVEMENT OF GEOGRAPHICAL INDICATIONS

Rome, 2021
ISBN 978-92-5-134869-7
180 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

This guide presents two evaluations: prospective evaluation and retrospective evaluation. Prospective evaluation helps stakeholders maximize benefits and prevent possible drawbacks, while a retrospective analysis allows stakeholders to identify possible areas for improvement.

STORIES FROM AFRICA

CHANGING LIVES THROUGH DIVERSIFIED HEALTHY FOODS

This publication highlights FAO's cross-cutting work on nutrition, such as raising chickens in Cameroon and promoting nutrition-sensitive agriculture in Rwanda. These stories show that through hard work, innovation and partnerships, ending hunger and malnutrition is possible.

Accra, 2021
ISBN 978-92-5-133838-4
64 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English, French

PLANT PRODUCTION AND HEALTH

Plants are essential to the way we live – they make up 80 percent of the food we eat and produce 98 percent of the oxygen we breathe. In times of COVID-19, it is more important than ever to redouble our efforts, promote sustainable crop production systems and raise awareness about plant health. To ensure plant health, FAO and the International Plant Protection Convention (IPPC)

promote several **environmentally sensitive plant protection approaches**, as well as a guide for pest status determination and a scientific review of the **impacts of climate change on plant pests** (p. 119). Managing pesticide use is just as important as managing pests and diseases, and FAO works closely with the World Health Organization on an ongoing basis to set standards and codes of conduct for

pesticide use, and with the UN Environment Programme through the Rotterdam Convention (p. 120). To raise global awareness of the importance of the importance of millets for healthy diets, the UN General Assembly designated 2023 as the **International Year of Millets**, following the **International Year of Fruits and Vegetables** (2021) and the **International Year of Plant Health** (2020), with FAO leading the celebrations. ■

Available in: English

Species that produce orthodox seeds and that can be conserved in seed genebanks include cereals, grain legumes, forages, most vegetables and some fruits. This guide overviews operations for the conservation of orthodox seeds in seed genebanks.

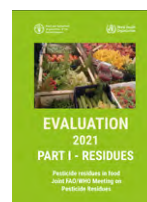

PESTICIDE RESIDUES IN FOOD

JOINT FAO/WHO MEETING ON PESTICIDE RESIDUES – REPORT 2021

FAO & WHO, Rome, 2022
ISBN 978-92-5-135632-6
424 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

The Meeting evaluated 15 pesticides, including five new compounds and two compounds that were re-evaluated for toxicity or residues. It also estimated supervised trials median residue (STMR) and highest residue (HR) levels as a basis for estimating dietary exposures.

JOINT FAO/WHO MEETING ON PESTICIDE RESIDUES EVALUATION 2021 PART I

FAO & WHO, Rome, 2022
ISBN 978-92-5-136044-6
1199 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

The meeting evaluated 15 pesticides, including five new compounds and two compounds that were re-evaluated for toxicity or residues. It established acceptable daily intakes and acute reference doses, and estimated maximum residue levels and recommended them for use by the Codex Committee on Pesticide Residues.

RESILIENCE

Conflict, climate change and the COVID-19 pandemic are driving persistently high humanitarian needs, eroding livelihoods and coping capacities and pushing millions of people to the very brink of extreme hunger and even famine. FAO plays a unique role in **preventing and addressing acute hunger** and **supporting countries** experiencing food crises to build resilience and chart a path of growth and

prosperity. The publications in this section represent a collection of knowledge gathered through FAO's long experience of working on the ground in humanitarian and crisis contexts.

FAO's **Office of Emergency and Resilience** partners with a range of actors at the global, national and local levels to monitor situations of acute food insecurity (p. 123) and signal needs to the humanitarian community, as well as to rally

resources for building resilient agrifood systems in fragile contexts (pp. 124–125) and tackling acute hunger at the source. ■

BANGLADESH – IMPACT OF ANTICIPATORY ACTION

STRIKING BEFORE THE
FLOODS TO PROTECT
AGRICULTURAL
LIVELIHOODS

This study documents the outcome of acting early to protect farming families in northwestern Bangladesh from impending floods.

Dhaka, 2021
40 pp., 210 x 297 mm
Available online only
Available in: English

COLOMBIA – IMPACT OF EARLY WARNING EARLY ACTION

BOOSTING FOOD
SECURITY AND SOCIAL
COHESION ON THE
FRONTLINE OF THE
MIGRATION CRISIS

This study analyses the outcomes of monitoring early warning signs related to drought and mass migration and taking targeted early actions in northern Colombia between 2018 and 2019.

Rome, 2019
28 pp., 210 x 297 mm
Available online only
Available in: English,
Spanish

THE PHILIPPINES – IMPACT OF EARLY WARNING EARLY ACTION

EXPLORING THE
INTERPLAY BETWEEN
EL NIÑO-INDUCED
DROUGHT, CONFLICT
AND GENDER

This study analyses the outcome of acting early on the island of Mindanao in the Philippines between 2018 and 2019, ahead of an El Niño-induced drought. It evaluates the effectiveness of anticipatory actions and highlights families' perspectives on the benefits of acting early.

DESERT LOCUST UPSURGE – PROGRESS REPORT ON THE RESPONSE IN THE GREATER HORN OF AFRICA AND YEMEN

SEPTEMBER–DECEMBER 2020

A summary of FAO's work on curbing the spread of desert locust. It introduces approaches to ground and air control operations and surveillance activities, such as the eLocust3 system and the hotline system.

Rome, 2021
40 pp., 210 x 270 mm
Price available upon request
Paperback
Available in: English

UGANDA: FOOD SECURITY AND LIVELIHOODS IN AREAS AFFECTED BY DESERT LOCUSTS, SEPTEMBER 2020

ASSESSMENT REPORT

The assessment found that desert locusts significantly reduced crop production and destroyed pastures for livestock in Uganda, most notably from May 2020 onward. There is a critical need to strengthen the country's capacities for real-time surveillance and rapid verification.

Rome, 2021
ISBN 978-92-5-134840-6
100 pp., 210 x 297 mm

Available in: English, French, Spanish

This guidance note aims to support country offices in designing and implementing inclusive risk communication and community engagement initiatives in order to enable authorities and communities to work together to promote healthy behaviour and reduce the risk of spreading infectious diseases.

CFSAMS SPECIAL REPORTS

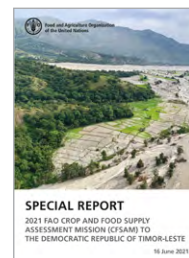

These special reports analyse the current food supply and agricultural situation in countries experiencing food supply difficulties.

FAO/WFP CROP AND FOOD SECURITY ASSESSMENT MISSION (CFSAM) TO THE REPUBLIC OF SOUTH SUDAN
2020

According to this report, 2020 net cereal production from the traditional sector in South Sudan was 7 percent above 2019 output. This increase was driven by an expansion of harvested area and by abundant and well-distributed rains.

FAO & WFP
Rome, 2021
ISBN 978-92-5-134347-0
90 pp., 210 x 297 mm

FAO CROP AND FOOD SUPPLY ASSESSMENT MISSION (CFSAM) TO THE DEMOCRATIC REPUBLIC OF TIMOR-LESTE
2021

This report shows that the production of main staple crops increased due to favourable rainfall throughout the cropping season. It is estimated that the 2021 production of maize, rice and root crops is at about 136 400 tonnes, nearly 8 percent above the past five-year average.

Rome, 2021
ISBN 978-92-5-134595-5
56 pp., 210 x 297 mm
USD 52.00, Paperback
